ColonialWebb Announces Partnership with EPA's ENERGY STAR® Program

April 20, 2010, Richmond - ColonialWebb announced today a fundamental commitment to protect the environment by becoming an ENERGY STAR Partner. ColonialWebb, through its voluntary partnership with the U.S. Environmental Protection Agency, will work to help their clients improve energy efficiency and fight global warming. With a proven track record of reducing their client's utility bills, ColonialWebb has been recognized by the EPA and awarded the ENERGY STAR partner status.

"We are proud to have earned the ENERGY STAR partner status," said Ray Battani, Director of ColonialWebb's Green Energy Solutions Team. "We will use this program along with our Energy Dig audit process to find low cost, no cost, and high return on investment savings opportunities for our customers."

In partnership with ENERGY STAR, ColonialWebb will:

- Measure and track the energy performance of its client's facilities by using tools such as those offered through ENERGY STAR.
- Develop and implement a plan consistent with the ENERGY STAR Energy Management Guidelines to achieve energy savings.
- Help spread the word about the importance of energy efficiency to its staff and community.
- Support the ENERGY STAR Challenge - a national call-to-action to help improve the energy efficiency of America's commercial and industrial buildings by 10% or more.
- Highlight its clients achievements with recognition offered through ENERGY STAR.

"ENERGY STAR partners, such as ColonialWebb, are leading the fight against global warming by improving the efficiency of their buildings and facilities," said Jean Lupinacci, chief of EPA's ENERGY STAR Commercial and Industrial branch. "We applaud these efforts to help protect our global environment for generations to come."

Company Profiles

ColonialWebb is a Mechanical, Electrical and Energy Solutions Company. Green Energy Solutions are the integration of their core HVAC, plumbing, building controls, and electrical services with energy savings and environmental improvements. Formed in 1972, ColonialWebb now has over 1200 employees serving the Virginia, Maryland, DC, West Virginia, North Carolina, and South Carolina regions. For more information please visit www.colonialwebb.com.

ENERGY STAR was introduced by the EPA in 1992 as a voluntary, market-based partnership to reduce greenhouse gas emissions through energy efficiency. Today, the ENERGY STAR label can be found on more than 60 different kinds of products, new homes, and commercial and industrial buildings. Products and buildings that have earned the ENERGY STAR designation prevent greenhouse gas emissions by meeting strict energy-efficiency specifications set by the government. Last year alone, Americans, with the help of ENERGY STAR, saved about \$19 billion on their energy bills while reducing the greenhouse gas emissions equivalent to those of 29 million vehicles.
